

Communication

Date	7 July 2026
Team ID	
Project Name	AI Student Evaluation Dashboard
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Slack / WhatsApp	Core Developers & QA	Review daily task distribution, track code sync steps, and resolve quick development blockages.
2	Progress Update	Weekly	Google Meet	Full Team & Project Mentor	Present dashboard layout iterations, demonstrate Streamlit chart alignments, and plan upcoming sprints.
3	Issue / Bug Discussion	As Needed	GitHub Issues / Discord	Developers & Testers	Debug system response times, local data parsing issues, or rules-based text grading mismatches.
4	Stakeholder Review	Bi-Weekly	Microsoft Teams	Full Team & Evaluators	Share intermediate project milestones, gather assessment feedback, and align with grading rubric requirements.
5	Final Demo Rehearsal	Once	Google Meet	Full Team & Mentor	Perform an end-to-end dry run of the local dashboard evaluation flow and verify presentation assets.
6	Documentation Sync	As Needed	Google Docs		

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
				Technical Writers / Devs	Collaborate concurrently on performance testing tables and project executable checklist documentation sheets.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Coordinating collaborative development syncs due to fluctuating daily schedules of individual team members.	Standardized an explicit micro-update baseline rule inside the shared Slack channel for text status notifications.
2	Explaining abstract technical layout rendering errors or state handling loops clearly via text messages.	Adopted instant screen-sharing huddles on Discord to provide direct interactive walkthroughs of local issues.
3	Consolidating feature improvement feedback items efficiently without losing critical action points.	Utilized structured GitHub Repository kanban boards to log, track, assign, and mark review action notes completed.
