

Project Demo Planning

Date	8 July 2026
Team ID	
Project Name	AI Student Evaluation Dashboard
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Context	Outlining the core student response evaluation constraints, dashboard objectives, and problem statement framework.	2 mins	Project Lead
2	Sidebar Navigation Layout	Demonstrating functional multi-view page tabs switching loops between Home, Upload Audio, AI Analysis, Dashboard, and Report pages.	2 mins	UI Developer
3	Performance Summary Metrics	Showcasing dynamic scoring panel card state updates rendering key targets (Score: 73/100, Similarity: 73%, Grade: C).	3 mins	Backend Developer
4	Transcript Parsing Logic	Live walkthrough of reading and processing custom student input descriptions based on Artificial Intelligence branch definitions.	3 mins	NLP Engineer
5	Feedback & Suggestions Engine	Reviewing rule-based real-time parsing highlighting contextual student evaluation strengths, layout mistakes, and typo correction guides.	3 mins	ML Engineer
6	Validation Toast & Closing	Demonstrating the green verification toast notification execution cycle indicating successful parsing, followed by a local baseline performance summary wrap-up.	2 mins	QA Tester

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Frame the technical necessity for automated student response tracking and text analysis verification tools.
2	Solution Overview	Detail core modular file system architecture mappings linking the local Streamlit application layout context to background scoring rules engines.
3	Live Feature Demonstration	Conduct an end-to-end active presentation execution run of the evaluation modules inside the localhost:8501 server ecosystem.
4	Q&A Session	Address evaluator questions regarding evaluation rules scaling paths and system request response limits.
