

Data Flow Diagram

Date	1 July 2026
Team ID	
Project Name	Voice based concept understanding analyser
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Student, Instructor).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Transcribe Audio, Compute Semantics).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Rubric Database, Assessment History).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example Architectural Flow diagram

The diagram below illustrates how speech inputs from a student are captured, converted to text, verified semantically against custom knowledge metrics, and saved cleanly to system records.
